

Part B evaluation check list

Owner:.....

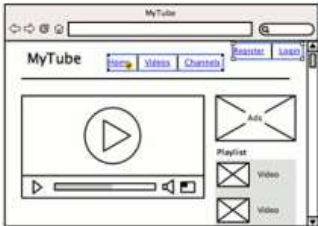

Marked by:

Evaluate Part B document (about 300 words), Record of Tasks (ROT – no word count) and Appendix (no word count, but has a contents page)

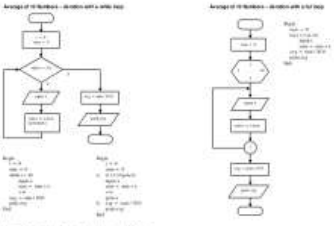

- Evidence of versions
provided evidence that there will be checks/feedback to client (with evidence in appendix, cross referenced with interaction in ROT)
- ROT must include regular interactions with client
ideally after every version and with detail at the end where it is installed at client's side
- detailed layout design sketches
clear drawings showing what each version/stage will look like
- annotations for complex techniques with evidence of algorithmic thinking
in the form of flowcharts, UML diagrams, pseudo-code
- test plan that addresses all success criteria
test must show test data and what would constitute a successful test

Version number 2: *Sorting now works*

Designs proposed to client

Algorithm for section

See appendix B7 for client verification/feedback
